

# News of Mine, of Prospect, of Furnace and of Mill.

## GOLD BULLION FROM BAMBERGER

Precious Consignment From the Big Plant Goes Through Town En Route to Sub-Treasury.

With a consignment of gold bullion of the value of \$15,000 Hon. Simon Bamberger, president and general manager of the big gold-bearing mines at De La Mar, Nev., came in from camp yesterday morning, another consignment of the precious output of two weeks at the new plant to follow him. At present he reports Frank Swindler, the general superintendent of the properties and plant reducing 500 tons of crude ore daily that affords a most satisfactory average, while to swell the present output the management has decided to proceed at once with the construction of a tailings plant that will enable it to reduce no less than 500 tons daily. The tailings, said President Bamberger, will maintain an average of \$2.50 gold per ton. To recover this only a small amount of cyanide of potassium will be required, as the salts from the chemical remain in the product. It is estimated that the tailings at least half a million tons have accumulated on the dump, and with a net saving of \$1 it is easy to see how a fortune shall be added to the company's resources. President Bamberger says that Manager Swindler has the mill and mines well in hand, and that the condition throughout is a most satisfactory one.

## BUSY SEASON BEGINS ON GOLD MOUNTAIN

The season on Gold Mountain has dawned upon a campaign of unusual activity, said James Long, Jr., who was in from that region during the day. At the Annie Laurie, in which the gold-bearing ledge was recently tapped through the lower tunnel, the mill is running steadily on ore of good quality, from the upper workings, while on the Holland, owned by Willard F. Snyder and others, the tunnel is now advancing in mineral water, and a stream of ore is expected during any shift. It is understood that at the Sevier, on which the last payment will have been made in a short time by Capt. Lawrence and his associates, the management will do some further development in the ore bodies before the reconstruction of the mill is begun, while at the Mammoth, controlled by Mr. Long and his syndicate, work, systematic and continuous, will be inaugurated as soon as the snow disappears. The tunnel on the Annie Laurie Extension is now in a distance of 400 feet, with the ledge expected in a short time, while at the Trapper's Pride the management is achieving good results, and its equipment for the reduction of ores the present year is not at all unlikely. Several others will start work next month, says Mr. Long, and the season's operations promise a number of most gratifying disclosures.

## GREAT WESTERN TUNNEL HAS GONE 1200 FEET

A report from the properties of the Great Western Mining company above Park City informs Hon. David Evans, the manager, that the tunnel has now cross-cut the country for 1200 feet, with it to be advanced, under the present contract, 400 feet further, or to a station 1600 feet from the mouth of the long avenue. Two hundred feet distant the management expects to connect with the big ledge in which ores of excellent quality have been encountered, and that active production will follow, appearing at this time, quite conclusive. The ledge will be tapped at a vertical depth of 500 feet, and with this stretch of stopping the management feels that the future of the big proposition is assured.

## JOE BOWERS HEADED FOR THE ORE CHANNEL

To tap the channel of high-grade ore, a consignment of which recently appeared on the local market, the management of the Joe Bowers of Tintic is now extending the 300-foot level, the connection to be made, according to measurements in the next forty-five feet. James Creighton, who is serving the company in an advisory way, and who recently visited the property reports a most encouraging condition, but to extract the ore at less expense recommends that the 300-foot level be extended to the channel.

## MORE GOLD BULLION FROM THE CENTURY

The Century of Park valley reported with another consignment of gold bullion yesterday, and while the value of it was not revealed, it approximates the amount required to meet the next dividend. At the mill the full battery of stamps is now in commission, while conditions underground are more favorable, it is said, than at any period since the development of the ledge was inaugurated. Manager Madden, who has been most successful from the date the mine passed into his custody, is relying on a most productive year.

## LUCK OF THE UTAH IN GOLDFIELD GROUND

The dispatch of Monday last telling of the strike in the Red Top of Goldfield is verified by the Bonanza of Tonopah, the immediate beneficiaries, none other than J. T. Bradley and Isaac McKay, long identified with Messrs. Kearns and Keith of this city, and who have been developing the ground under a lease. In its story of

the strike the Bonanza says that twelve feet from the ledge, which is twelve feet from the walls, show from \$19 to \$487, and adds: "The opening up of this ledge, and the obtaining of these values, while of the utmost importance to the district, does not come wholly in the nature of a surprise, especially in the consensu with the location and the formation. It simply verifies the opinions of mining experts that a big mine would be found in this locality."

## THE DAY'S TRADING IN STOCK MARKET

The day on the mining exchange closed on the sale of 100 shares of stock, for \$72.50, and with the market again practically unchanged. Daily, with ores of good quality issuing from the Maseppa shaft, was the more prominent of the in the advancing column and sold at \$2.71, the buyer taking thirty days in which to pay for it at those figures, while Ajax brought 15 cents and then relaxed a fraction to a story that on the lower levels the condition indicated an important change. Grand Central responded with 20 to a bid of \$4.50 and closed an offering at that price. Daily West brought \$2.25, with Con. Mercur showing much activity around 30 cents. Star Con. was again a popular want at 10 1/2 cents, while Yale Con. was reduced to 28 cents without apparent justification, with Tetra shading its sales to 25 1/2 and Lower Mammoth filling an order at 19 cents. New York was weak, notwithstanding the new pump is taking care of the water on the lower level, while Butler-Lab was down to 12 cents, the day closing on the following market:

	A. M.	P. M.
Ajax	14 1/2	14 1/2
Butler-Lab	11 1/2	11 1/2
Carls	11 1/2	11 1/2
Creole	11 1/2	11 1/2
Con. Mercur	30	30

Yankee Con.	30	30

**MORNING SALES.**  
Ajax, 100 at \$14 1/2; 100 at 14 1/2.  
Daily West, 22 1/2 at \$22 1/2.  
Daily West, 22 1/2 at \$22 1/2.  
Grand Central, 20 at \$4 1/2.  
Lower Mammoth, 100 at \$19.  
Star Consolidated, 700 at \$15 1/2; 500 at \$15 1/2; seller fifteen days; 500 at \$15 1/2; seller fifteen days.  
New York, 100 at \$100.  
Yankee Consolidated, 100 at \$30; seller thirty days; 100 at \$30; 100 at \$30; seller thirty days.  
Shares sold, 325.  
Selling value, \$233.20.

**OPEN BOARD.**  
Daily, 500 at \$2.71, buyer thirty days.  
Daily West, 22 1/2 at \$22 1/2.  
May Day, 100 at \$100, buyer thirty days.  
Tetra, 20 at \$25 1/2.  
Shares sold, 125.  
Selling value, \$324.75.

**AFTERNOON SALES.**  
Con. Mercur, 100 at \$30; 100 at \$30.  
Daily West, 22 1/2 at \$22 1/2.  
Lower Mammoth, 100 at \$19.  
Butler-Lab, 500 at \$12.  
Shares sold, 265.  
Selling value, \$258.

**OPEN BOARD.**  
Ajax, 100 at \$14 1/2.  
New York, 500 at \$100; 500 at \$100.  
Shares sold, 200.  
Selling value, \$200.

## San Francisco Mining Stocks.

SAN FRANCISCO, April 27.—The official closing quotations for mining stocks today were as follows:

Andes	10	Justice	12
Belcher	27	Mexican	21
B. & B.	1	Old Con.	12
Calumet	10	Ophir	50
Caledonia	34	Overman	24
Chal. Con.	20	Potosi	12
Chollar	20	Sage	15
Confidence	100	Seg. Belcher	15

Michigan	4.50	Wolverine	71.00

## Special to The Tribune.

BOSTON, Mass., April 27.—Another dull day in the Boston market. Few sales were made during the greater part of the day, but a firm undertone was noticeable. The strength shown by Amalgamated during the last hour started traders bidding for local shares, but few transactions were made, as in most cases few stocks were found for sale. The market closed generally firm. Hornblower & Weeks, brokers, 53 State street, Boston, and 10 Wall street, New York, furnish the following quotations:

WASHINGTON—Willard, Raleigh.

## YAMPA TO SHIP TO BINGHAM FURNACES

The management of the Yampa mines at Bingham has decided to forward to the furnaces of the Bingham Con. smelter in the valley, 200 tons of ore daily while the equipment of its own plant in Bingham is being perfected, according to last night's arrival from camp, this is to be inaugurated at once. Meanwhile the smelter, which has been reducing about 170 tons of ore a day, is to have its capacity increased and at the resumption of at least 200 tons of ore will be daily reduced. To enable the management to do this, the plant will be blown out for about sixty days and when the order to resume is posted, Manager Robinson will have been prepared to reduce the tonnage for which the plant was originally designated.

## CHEERFUL VIEW OF THE COPPER OUTPUT

Are we to expect another boom in copper? Have the advances scored during the past few weeks placed prices on the left level attainable, or are we to look for the further development of strength? These are questions being asked by hosts of consumers both on this and the other side of the Atlantic, and to which, in many instances, apparently, replies are being given in the affirmative. It is not a matter for surprise that it should be so. The copper situation in the United States is very conspicuous just now, says the Commercial Bulletin of Boston on its editorial page. A glance at the statistical situation will readily explain our meaning. In this country the monthly production during the first quarter of the year is believed to have aggregated about 25,000 tons. Since the dissolution of the Copper Producers' association accurate information as to the output is thought to be liberal. Now, almost continuously since the beginning of January, consumers in Germany and England have displayed a lively interest in the market, with the result that the price has risen from an average of 22 1/2 cents per month, or approximately twice as much as during the corresponding period in 1903. To predict the duration and extent of this foreign demand is, of course, impossible, but it would be unsafe to count upon its immediate cessation.

The home consumption is believed by conservative authorities to have accounted during the past three months for at least 15,000 tons, and there is certainly no good reason for expecting an early diminution. To sum up, we have produced each month this year 25,000 tons, while we have sent abroad 10,000 tons, leaving for domestic use but 15,000 tons. If we compare prices ruling last month with those prevailing during March, 1903, we find the latter at 22 1/2 cents, while in 1904 it was 22 1/2. Now it is 23 1/2. Have the increased exports this year more than atoned for the increased home consumption? We think they have. If we are right, is not a further advance in order?

## SINKING ON STRIKE IN QUINCY GROUND

Ernest Bamberger, assistant manager of the Daly West, who came down from camp again on Tuesday night, says the new strike in the Quincy ground is proving up most satisfactory to him and that everything indicated strength and permanence. At present he is following the channel with a winze and the ore coming from it is all first class. The water supply at the mill is steadily increasing while the mine plan is at present indicated between nine and ten tons of fine product daily. John A. Kirby, general superintendent of the company's properties, who recently underwent an operation for appendicitis was at the Quincy offices again during the day with congratulations awaiting him from all sources.

## PRESIDENT DERN BACK FROM OLD MEXICO

With samples of ore that must determine the fate of an option recently acquired by him on gold-bearing property in the State of Jalisco, Mex., Hon. John Dern, president of the Con. Mercur, came in from the South Tuesday night and that everything indicated strength and permanence. At present he is following the channel with a winze and the ore coming from it is all first class. The water supply at the mill is steadily increasing while the mine plan is at present indicated between nine and ten tons of fine product daily. John A. Kirby, general superintendent of the company's properties, who recently underwent an operation for appendicitis was at the Quincy offices again during the day with congratulations awaiting him from all sources.

## THE DAY'S RETURNS ON ORE AND BULLION

In the ore and bullion market the day's settlements amounted to \$90,800, McCormick & Co. reporting them as follows: American bullion, \$49,700; gold bullion, \$2400; gold, silver lead and copper ore, \$25,700.

In the metal market silver ruled at 55 cents an ounce, lead at \$3.50 per hundred pounds and casting copper at 12 1/2 cents a pound.

## Tonopah Stock Sales.

Monday's transfers on the San Francisco board were recorded as follows: MacNamara 2650 at \$22 1/2; 2300 at \$22 1/2; buyers thirty and sixty days; Montana-Tonopah, 1300 at \$1.50; Belmont, 3000 at \$2 1/2; Tonopah Extension, 100 at \$1; Midway, 1000 at \$3 1/2; 1000 at \$3 1/2; seller thirty days.

## LEAD OUTPUT OF HONERINE'S MINES

Seven New Tables Leave for the Plant With Regard to Be Increased.

With which to increase the output of concentrate at the Honerine mill seven more tables were sent out by Fred Richmond of the Salt Lake Hardware company yesterday, while the regrounding capacity is now being increased to a capacity which will enable the management to handle 300 tons daily. With this increased equipment the Honerine, said Manager Willard F. Snyder yesterday, will have become a lead producer greater than any in the State, while a computation of its resources makes it almost positive that ultimately it may be relied on for one-fifth of the lead output of the Western country. The waters in the main workings of the mine have not been reduced to the bottom of the main shaft, which is at a depth of 800 feet, and the condition throughout is a most cheerful one. At present the management is sending to the furnaces of the American Smelting & Refining company over sixty tons of concentrates containing over thirty tons of lead daily, without reference to the silver and gold contained in them, and this will have been increased in a short time.

## THE MONTANA IS ATTAINING SOME DEPTH

The main shaft of the Montana company's properties at Tonopah has now been dropped down to a depth of 700 feet, says the Bonanza of that camp, and the crosscut north to the ore bodies has been begun. The new hoist of fifty horse power has been working for nearly a week and great progress is being made in raising to the surface the immense amount of ore and dirt which had accumulated in the drifts and crosscuts which the old gasoline hoist was unable to cope with. It is stated on good authority that Mr. Henry Kehoe, acting for the Gooderham and Blackstock syndicate of Canada, was desirous of obtaining control of the property at a price largely in excess of the present market price of the stock, but overtures made to the company brought forth a response indicating that the present management were not desirous of selling their interests and incidentally it may be stated that the ore reserves blocked out in the mine are estimated at \$5,000,000.

The Salt Lake interests say that while the surplus has risen to most gratifying heights that the payment of another dividend is indefinite and that it will await the action of the board of directors some weeks later.

## THE MONARCH SHOWS SOME SHIPPING ORES

Mr. W. H. Routledge, superintendent of the Tonopah-Monarch company's property, adjoining the General Thomas mine, came into town Friday. He states that Mr. J. J. Lamm, the secretary of the company, will arrive from San Francisco in a few days and plans for the development and working of the property on an extensive scale will be formulated. During the last two months the holdings of some of the weaker shareholders have passed into strong hands, and the company is now well equipped financially to work on a big scale. As the mine shows considerable ore in its main shaft, its future development will be watched with great interest—Tonopah Bonanza.

## ORE RECEIPTS FROM MINES OF TONOPAH

With the terminus of the Tonopah-Rhodod railway now within twenty-eight miles of the end of tonnage silver, receipts at the American furnaces from that source are increasing, while there is every assurance that they will be doubled in a short time. W. G. Lamb, sales agent for the Tonopah Mining company, yesterday drew down a check for two more cars of ore of fine quality.

## Mining Notes.

Walter G. Filer of the Western Exploration company has gone to San Francisco. George Dern, manager of the Con. Mercur, leaves for camp again this morning.

Manager Channing of the Utah Con. left for its Bingham bonanza yesterday morning.

Joseph Dederichs, superintendent of construction at Newberry, left for that southern camp last night.

The arrival of Managing Director Jackling of the Utah Copper company from Central office and here in the city.

Superintendent Andrew Mayberry of the United States company's Bingham mines came in from camp again last night.

A. E. Hyde, Jr., manager of the Annie Laurie mine and John Kimberly, is in town conferring with local interests.

The management of the Dixie mines and smelter out of St. George has another consignment of copper bullion at the sampler.

Hon. Byron E. Shear of Denver is in town again on his way into Nevada, where he is promoting the development of a number of interests which need much promise.

The contract for three boilers, each of 200 horse power, was yesterday awarded the local representative of Babcock & Wilcox, the boilers to be delivered in the next ninety days.

James Connolly, who is developing interests along the margins of the San Pedro and near Searchlight and Good Springs, Nev., came in from the South-west again yesterday.

Manager William Dayley of the Copper belt railway, who was back at his desk yesterday, reports twenty carloads of ore going over the route daily, with the new engine getting ready to go into commission.

Capt. MacVie left for Stockton yesterday morning to inquire into developments on the Galena King and to inspect the Honerine mill, to which the Galena King will ultimately ship some of its second-class ore.

A letter was yesterday received by A. H. Moynie from G. C. Charlton, who has reached Fish Springs in the Deep Creek country, on his way to a new group of locations acquired by the former out of Sodaville, Nev.

Manager H. S. Joseph of the Silver Shield came in from that Bingham proposition last night and reports the tunnel making most satisfactory advances to a station from which a crosscut will be run to the main shaft ledge.
